What is this product?

Type

This product is an investment fund.

Objectives

Investment objective This Sub-Fund is a feeder fund of the UCITS: Neuberger Berman Emerging Market Debt Blend Fund (the "Master UCITS"). The Sub-Fund will invest at least 85% of its net assets in shares of this Master UCITS.

Its management objective is the same as that of its master, namely to obtain an attractive level of absolute return through a combination of debt denominated in a strong currency issued in emerging Countries, local currencies of emerging countries and debt issued by issuing companies in Emerging Countries.

Investment policies The assets of the Sub-Fund are composed entirely and permanently of IE00BMN93530 USD shares, and, on an ancillary basis, of cash (i.e. bank deposits on demand, such as cash held in current accounts with a bank that is accessible at any time) representing up to 15% of the net assets of the Sub-Fund for cash flow purposes or in case of adverse market conditions. This limit may only be exceeded temporarily for a period of time strictly necessary when, due to exceptionally adverse market conditions, circumstances so require and such excess is justified in the interests of shareholders, for example in very serious circumstances such as the September 11 attacks or the collapse of Lehman Brothers in 2008.

While this Sub-Fund promotes environmental characteristics within the meaning of article 8 of the SFDR, it does not currently commit to investing in any "sustainable investment" within the meaning of the SFDR or the EU Regulation 2020/852. Accordingly, it should be noted that this Sub-Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and its portfolio alignment

with such Taxonomy Regulation is not calculated. Therefore, the "do not significant harm" principle does not apply to any of the investments of this Sub-Fund. Indeed, the Master UCITS qualifies as an article 8 SFDR financial product. The Master UCITS promotes environmental and social characteristics and limits investments to companies that follow good governance practices, but does not commit to make any sustainable investment within the meaning of the SFDR or the EU Regulation 2020/852.

Derivative Policy The Sub-Fund will not enter into swap transactions. The Sub-Fund will also neither make use of securities financing transactions in form of securities lending nor of total return swaps.

Intended institutional investor

Investments in this Sub-Fund are likely to be suitable for Monegasque institutional investors willing to accept the generic risks associated with investments in emerging countries and the risks associated with medium to long term bond markets as well as medium to high levels of volatility due to investments in emerging securities and/or securities rated below investment grade.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of Mediobanca Management Company SA. to pay you.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <https://www.mediobancasicav.com/en/our-offer/prospectus>

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between October 2019 and October 2022.

Moderate: this type of scenario occurred for an investment between February 2018 and February 2021.

Favourable: this type of scenario occurred for an investment between January 2016 and January 2019.

What happens if Mediobanca Management Company SA. is unable to pay out?

Losses are not covered by an investor compensation or guarantee scheme. Furthermore, with respect to BNP depositary of the Fund responsible for the safekeeping of the assets of the Fund (the "Depositary"), there is a potential default risk if the assets of the Fund held with the Depositary are lost. However, such default risk is limited due to the segregation of assets between those of the Depositary and the Fund. The Depositary is liable to the Fund or to the investors of the Fund for the loss by the Depositary or one of its delegates of a financial instrument held in custody unless the Depositary is able to prove that the loss has arisen as a result of an external event beyond its reasonable control. For all other losses, the Depositary is liable in case of its negligent or intention failure to properly fulfil its obligations pursuant to the UCITS Law and any applicable rules and regulations.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

Example Investment 10,000 USD	if you exit after 1 year	if you exit after 3 years (recommended holding period)
Total Costs	358 USD	759 USD
Annual cost impact*	3.6%	2.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.4% before costs and -0.0% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
