What is this product?

Type

This product is an investment fund.

Objectives

Investment objective The objective of this Sub-Fund is to provide highly competitive gross rates of return which exceed the return of the ICE BofA US 3-Month Treasury Bill Index (G001 Index).

Investment policies For this purpose, the Sub-Fund may invest, inter alia, in negotiable debt securities and other short and medium term instruments, fixed and floating rate bonds and money market products, including convertible bonds, as well as equities on an ancillary basis. A minimum of 70% of the net assets of the Sub-Fund will be invested in the signatures of investment grade issuers (as defined by Moody's, Standard & Poor's, Fitch or Bloomberg using the DRSK function) as well as in liquidity and similar instruments. The Sub-Fund may invest in UCITS compatible with the investment objective of the Sub-Fund, up to a maximum of 50% of its net assets. At least 95% of the net assets of the Sub-Fund will be invested in financial instruments with a residual maturity of up to three (3) years (including cash on current account representing up to 10% of the Sub-Fund's assets). The maximum average weighted residual term to maturity of the Sub-Fund will be eighteen (18) months. The Sub-Fund may hold, on an ancillary basis, up to 20% of its net assets in cash (i.e. bank deposits on call, such as cash held in current accounts at a bank which is accessible at any time) for liquidity purposes or in case of adverse market conditions. This limit may only be exceeded temporarily for a period of time strictly necessary when, due to exceptionally adverse market conditions, circumstances so require and such excess is justified in the interests of the shareholders, for example in very serious circumstances such as the September 11 attacks or the collapse of Lehman Brothers in 2008. If the Investment Manager considers it to be in the best interests of the shareholders, the Sub-Fund may also hold, on a temporary basis and for defensive purposes, up to 100% of its net assets in cash.

The Sub-Fund will not invest in CoCos or distressed securities. The Sub-Fund will neither invest in asset backed securities (ABS) nor in mortgage backed securities (MBS) as well.

The Sub-Fund is actively managed. The Investment Manager has complete freedom in choosing which assets to buy, hold and sell in the Sub-Fund, subject to the investment restrictions and guidelines set out in this Prospectus. Therefore, the composition of the portfolio holdings is not constrained by the composition of the index and the deviation of portfolio holdings from the index may be significant.

The sub-fund is not a Money Market Fund.

Derivative Policy For investment and/or hedging purposes, the Sub-Fund may also use financial derivative instruments whose underlyings are securities belonging to the categories defined above or notional amounts related to these same categories of securities. The Sub-Fund will not enter into swap transactions. The Sub-Fund will also neither make use of securities financing transactions in form of securities lending nor of total return swaps.

Intended institutional investor

Subscription for shares in this Sub-Fund is open to institutional investors.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that

the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of Mediobanca Management Company SA. to pay you.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between December 2019 and March 2020.

Moderate: this type of scenario occurred for an investment between June 2022 and September 2022.

Favourable: this type of scenario occurred for an investment between October 2023 and January 2024.

What happens if Mediobanca Management Company SA. is unable to pay out?

Losses are not covered by an investor compensation or guarantee scheme. Furthermore, with respect to BNP depository of the Fund responsible for the safekeeping of the assets of the Fund (the "Depository"), there is a potential default risk if the assets of the Fund held with the Depository are lost. However, such default risk is limited due to the segregation of assets between those of the Depository and the Fund. The Depository is liable to the Fund or to the investors of the Fund for the loss by the Depository or one of its delegates of a financial instrument held in custody unless the Depository is able to prove that the loss has arisen as a result of an external event beyond its reasonable control. For all other losses, the Depository is liable in case of its negligent or intention failure to properly fulfil its obligations pursuant to the UCITS Law and any applicable rules and regulations.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- you would get back the amount that you invested (0% annual return),
- 10,000 USD per year is invested.

Example Investment 10,000 USD	if you exit after 3 months (recommended holding period)
Total Costs	170 USD
Cost impact*	1.7%

(*) This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs.
